MEDICAL.

TO PHYSICIANS.

New York, August 16th, 1868.

Allow me to call your attention to my PREPARATION OF COMPOUND EXTRACT BUCHU. The component parts are BUCHU, LONG LEAF, CUBEBS, JUNIPER BERRIES.

MODE OF PREPARATION.—Buchu, in vacuo. Juniper Berries, by distillation, to form a fine gin. Cubebs extracted by displacement with spirits obtained from Juniper Berries; a very little sugar is used, and a small proportion of spirit. It is more palatable than any now to use.

Buchu, as prepared by Druggists, is of a dark color. It is a plant that emits its fragrance; the action of a flame destroys this (its active principle) leaving a dark and glutinous decoction. Mine is the color of ingredients. The Buchu, in my preparation, predominates; the smallest quantity of the other ingredients are added, to prevent fermentation; upon inspection, it will be found not to be a Tincture, as made in Pharmacies, nor is it a Syrup—and therefore can be used in cases where fever or inflammation exist. In this, you have the knowledge of the ingredients and the mode of preparation.

Hope that you will favor it with a trial, and that upon inspection it will meet with your approbation.

With a feeling of confidence, I am, very respectfully, H. T. HELMBOLD, Chemist and Druggist of 16 Years' Experience.
